Subject: Lane Plating Works Inc. Site Document Update

Hi there,

Just keeping everyone in the loop of a community update for Lane Plating. Here is what I sent out yesterday. Please see the below.

Thanks,

-Ed-

Good morning,

I just wanted to update you regarding some of the follow-up EPA mentioned at Councilman Atkins' community meeting on March 7, 2019.

If you go to

<https://cumulis.epa.gov/supercpad/SiteProfiles/index.cfm?fuseaction=second.scs&id=0605240&doc=Y&colid=36687®ion=06&type=SC>, there are three new site documents uploaded. There you will find the Sampling and Analysis Plan, which shows how EPA will be sampling for potential site contamination. You will also find the Conceptual Site Model Technical Memo, that details site information, characteristics and conditions. And finally, there is also the Response to Questions document that detail every question asked by the public at the March 7 meeting.

The site sampling is scheduled to start in May 2019, so expect to see a sampling team at the site during this time. EPA is also planning to strengthen and improve the fencing around the site to deter any unauthorized access, and is moving forward with establishing a site Community Advisory Group. Please keep an eye out for more updates in May 2019.

Thanks,

-Ed-
